2. Note

Please read these operating instructions before unpacking and putting the unit into operation. Follow the instructions precisely as described herein. The devices are only to be used, maintained and serviced by persons familiar with these operating instructions and in accordance with local regulations applying to Health & Safety and prevention of accidents.

By usage in machines, the measuring unit should be used only when the machines fulfil the EC-machine guidelines.

As per the "Pressure Equipment Directive 2014/68/EU"

No CE marking, see Article 4, Section 3 "Sound Engineering Practice", Directive 2014/68/EU

3. Instrument Inspection

All instruments are inspected before shipping and sent out in perfect condition. Should damage to a device be visible, we recommend a thorough inspection of the delivery packaging. In case of damage, please inform your parcel service / forwarding agent immediately, since they are responsible for damages during transit.

Scope of delivery:

The standard delivery includes:

- Turbine-wheel Flow Meter model: DPE-...
- Operating instructions

4. Regulation Use

Any use of the Turbine-Wheel Flow Meter, model: DPE-..., which exceeds the manufacturer's specification, may invalidate its warranty. Therefore any resulting damage is not the responsibility of the manufacturer. The user assumes all risk for such usage.

5. Operating Principles

The Kobold flow meter model DPE is used for measuring and monitoring liquids. The device works according the well-known blade wheel principle. The six vane blade wheel is retained axially in a high-quality sapphire bearing. The sensor is supplied ready-to-install with pipe fittings or with weld-on sleeves. The blade wheel is set in motion by the flowing medium. Hermetically sealed magnets are embedded in the ends of the blade wheels. The magnets generate electrical pulses in a Hall-effect sensor mounted outside the flow area.

6. Mechanical Connection

6.1. Check the installation conditions:

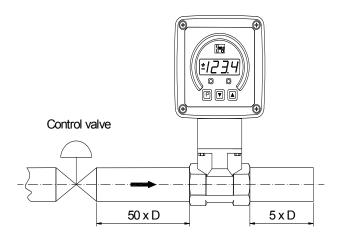

- Flow volume
- Max. operating pressures
- Max. operating temperature

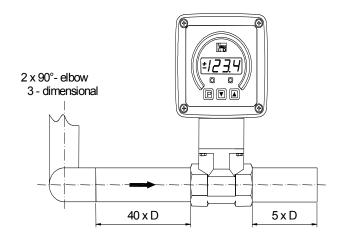

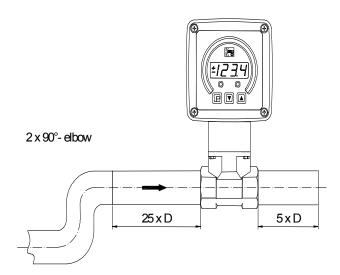

Caution! Exceeding the measuring range will damage the bearings in the device and lead to significant errors in measurement.

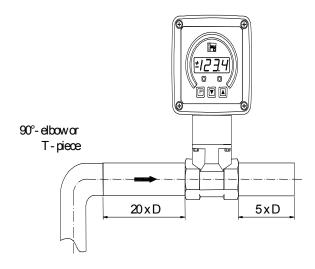

Page 4 DPE K05/0818

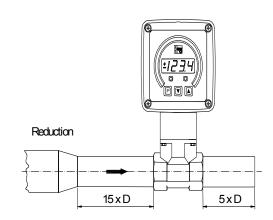

6.2. Inlet and outlet path straight piping requirements

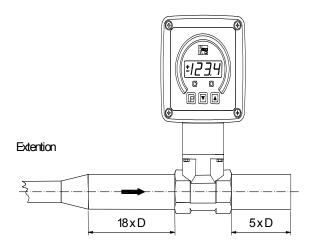

Page 6 DPE K05/0818

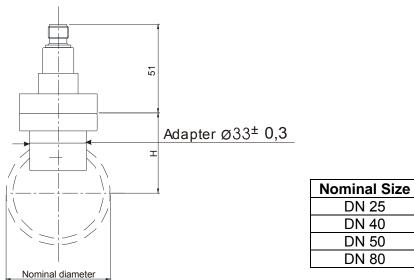

6.3. Installation

Standard installation

- Ensure that the flow is in the direction of the arrow (universal positioning).
- Avoid pressure and tension loads on the device.
 Mechanically secure the inlet and outlet lines at a distance of 50 mm from the connections.
- Check the connections for leaks.

Installation with mounting adapter: (DPE-1200W...)

Weld the adapter to the piping (to the proper depth, using **H** reference) as shown in the drawing (flow is in direction of arrow).

	DN 80	63
Nominal diameter		
-		
Position and weld-in the mounting adapter according	ng to the nomin	al diameter
suitable marking. The marking on the adapter mus	t be in line with	the outer
diameter of the pine. Also now attention to the later	nocition of the	rotating vano

30

44

46

suitable marking. The marking on the adapter must be in line with the outer diameter of the pipe. Also pay attention to the later position of the rotating vane (shaft of the vane shifted by 90° to the direction of flow).

7. Electrical Connection

7.1. General information

Attention! Make sure that the voltage values of your system correspond with the voltage values of the measuring unit.

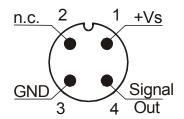

- Make sure that the supply wires are de-energized.
- Connect and plug in the system according to the connecting plans.
- We recommend to use wires with cross sectional area of min. 0,25 mm²

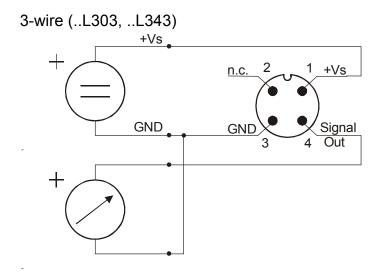

Attention! Wrong wiring will lead into damage of the unit's electronic.

Page 8 DPE K05/0818

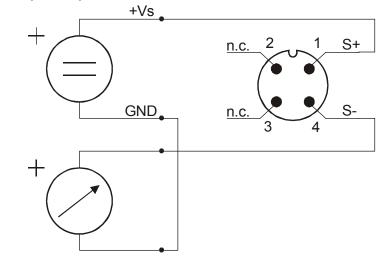

7.2. Electronic analyzer: Frequency output (..F300; ..F320, ..F340)

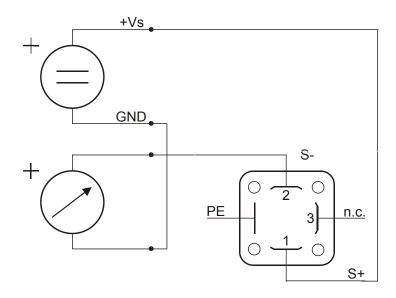

7.3. Electronic analyzer: Analog output (..L303, ..L342, ..L343, ..L442)

2-wire (..L342)

2-wire, DIN plug connector (..L442)

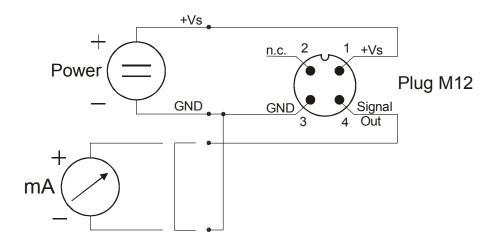

7.4. Compact electronics: (..C30R, ..C30M, ..C34P, ..C34N)

See

Operating instructions supplement for compact electronics with frequency output

Page 10 DPE K05/0818

7.5. Electronic analyzer: pointer indicator (..Z300, ..Z340)

Caution! In case current output is not needed, PIN 4 (Signal Out) is to be permanently connected with Ground (GND) (short circuit jumper).

7.6. ADI electronic analyzer

See

Operating instructions supplement for ADI electronic analyzer

8. Commissioning - Electronic Analyzer

8.1. General

These measuring devices are preset at the factory and ready for operation after the electric connection is completed.

8.2. Settings - Compact electronics

See

Operating instructions supplement for compact electronics with frequency output

8.3. Settings - ADI electronic analyzer

See

Operating instructions supplement for ADI electronic analyzer

9. Maintenance

This measuring device is maintenance-free when used in fluids that do not leave deposits. To prevent contamination problems, we recommend installation of a filter, such as a model MFR magnetic filter.

If the sensor has to be cleaned, it can be opened to access the internal parts. Make sure that the sensor and especially the turbine blades are not damaged. During reassembly, make sure that the turbine is positioned and oriented correctly. All work on the sensor electronics must be performed by the supplier; otherwise the guarantee will be voided.

10. Technical Information

10.1. Sensor data

Measuring ranges: 5 - 30...50 - 750 L/min. water

Measuring accuracy: ± 2.5% f. s.

Process temperature: max. 80 °C

Ambient temperature: max. 80 °C

Max. operating pressure: PN40 / 20 °C

PN 16 (DPE-1200W)

Max. pressure loss: DPE- 05: 0.05 bar

DPE- 10, DPE- 15: 0.03 bar

DPE- 20: 0.04 bar DPE- 25: 0.02 bar DPE- 30: 0.01 bar

Protection type: IP65

Materials:

Housing: Brass casting

Stainless steel 1.4581

Seals: Brass casting version: NBR

Stainless steel version: FPM

Turbine wheel: PVDF
Axle: Hard metal
Bearing: sapphire

10.2. Evaluation electronics

Frequency output

Power supply: $12 - 28 V_{DC}$ Power consumption: 10 mA

Pulse output: PNP, open collector, max. 25 mA

Electrical connection: plug connector M12x1

Page 12 DPE K05/0818

Frequency output with frequency divider

Power supply: $24 \text{ V}_{DC} \pm 20\%$

Power consumption: 15 mA

Pulse output: PNP, open collector, max. 25 mA

Electrical connection: plug connector M12x1
Division ratio: plug connector M12x1
1...1/128, factory setting

Analogue output (plug-on display option)

Power supply: $24 \text{ V}_{DC} \pm 20\%$

Output: 0 - 20 mA or 4-20 mA, 2-wire or 3-wire

Max. load impedance: 500Ω

Electrical connection: plug connector M12x1

or DIN 43 650

Option: plug-on display (with plug connector DIN 43 650

and 4 – 20 mA output only)

Compact electronics

Display: 3-segment LED

Analogue output: (0)4 - 20 mA adjustable, max. 500 Ω

Switching outputs: 1 (2) semiconductor PNP or NPN, factory set Contact operation: N/C N/O contact, frequence programmable

Setting: with 2 buttons

Supply: 24 $V_{DC} \pm 20\%$, 3-wire, about 100 mA

Electrical connection: plug connector M12x1

Pointer indicator with analogue output

Housing: aluminium

Display: moving-coil instrument, 240° display

Power supply: $24 V_{DC} \pm 20\%$

Output: 0 - 20 mA or 4 - 20 mA, 3-wire

Max. load: 250Ω

Electrical connection: plug connector M12x1

ADI electronics

Display: bar graph and 5-digit digital display

Analogue output: (0)4 –20 mA, 0-10 V_{DC} Two switching outputs: relay/ changeover contacts

max. 250 V_{AC}/5 A resistive load,

max. 30 V_{DC} / 5 A

Setting: via 4 buttons

Power supply: $100...240 \text{ V}_{AC} \pm 10 \text{ \% or}$

18...30 V_{AC}/10...40 V_{DC}

Electrical connection: pluggable terminal block via cable gland

DPE-...Exxx (Counter electronic)

Display: LCD, 2x8 digit, illuminated total, part and flow

quantities, units selectable

Analogue output: (0)4 –20 mA adjustable

Load: $\max. 500 \Omega$

Switching outputs: 2 relays, max. 250 V/5 A/1000 VA

Setting: via 4 buttons

Functions: Reset, Min./Max., memory, flow monitor,

monitoring for part and total quantity, language

Supply: 24 V_{DC} ±20 %, 3-wire Power consumption: approx. 170 mA

Electrical connection: pluggable screw terminals via cable gland

DPE-...Gxxx (Dosing electronic)

Display: LCD, 2x8 digit, illuminated total, part and flow

quantities, units selectable

Analogue output: (0)4 –20 mA adjustable

Load: $\max. 500 \Omega$

Switching outputs: 2 relays, max. 250 V/5 A/1000 VA

Setting: via 4 buttons

Functions: dosing (relay S2), start, stop, reset, fine dosing,

correction amount, flow switch, total quantity,

language

Supply: 24 V_{DC} ±20 %, 3-wire Power consumption: approx. 170 mA

Electrical connection: pluggable screw terminals via cable gland

13. EU Declaration of Conformance

We, KOBOLD Messring GmbH, Hofheim-Ts, Germany, declare under our sole responsibility that the product:

Turbine-Wheel Flow Meter Model: DPE -...

to which this declaration relates is in conformity with the standards noted below:

EN 61000-6-4:2011

Electromagnetic compatibility (EMC) - Part 6-4: Generic standards - Emission standard for industrial environments

EN 61000-6-2:2005

Electromagnetic compatibility (EMC) - Part 6-2: Generic standards - Immunity for industrial environments

EN 61010-1:2010

Safety requirements for electrical equipment for measurement, control and laboratory use - Part 1: General requirements

EN 60529:2014

Degrees of protection provided by enclosures (IP Code)

EN 50581:2012

Technical documentation for the assessment of electrical and electronic products with respect to the restriction of hazardous substances

Also the following EC guidelines are fulfilled:

2014/35/EU Low Voltage Directive

2014/30/EU EMC Directive 2011/65/EU RoHS (category 9)

For DPE-1230...

2014/68/EU
